סילבוס הקורס נושאים נבחרים בקומבינטוריקה 2 – 106928

סמסטר חורף תשפ"ב

מרצה: ד"ר שי מורן

Syllabus

We will cover basic mathematical models for machine learning, such as statistical learning, online learning, and distribution learning, and others.
In contrast with the course which was given last semester, which focused on the PAC model, this semester we will focus on online learning.

This course theoretical and requires mathematical maturity. In particular, we aim to incorporate discussions of open problems and active research direc- tions.

Prerequisites

Combinatorics, Probability Theory.
